Course Descriptions Summer Semester 2023

MSW Program at St. Mary's University of MN

Clinical Methods II

Clinical Methods II equips social work clinicians to execute the essential clinical tasks of engagement, assessment, intervention, and evaluation competently and effectively in practice with families and client groups. Clinical methods from psychodynamic, cognitive-behavioral, and postmodern approaches are examined through a multicultural lens to identify implicit biases or inherent theoretical assumptions that might impact their responsiveness and effectiveness across a broad cultural spectrum. Through self-reflection, a strengths-based perspective, and social work professional values, clinicians learn to select and apply clinical approaches that best match the client populations' needs and context.

Psychopathology

This course builds upon the foundation of HBSE I and II and introduces a biopsychosocial framework for typical, atypical, and pathological development throughout the lifespan. The concepts of mental health, mental illness, and diagnosis are explored using theory and historical and current contextual factors. This course also focuses on clinical assessment, case formulation, and diagnostic processes utilizing criteria from the Diagnostic and Statistical Manual of Mental Disorders (DSM) and other relevant tools.
