

In order to prevent delays in processing your utility permit, please ensure that the following items accompany your application.

We will require the following from the utility company/property owner BEFORE we review your permit application:

- Completed and signed utility permit application. The contractor section must be completed. If you have not yet chosen a contractor for your project, you must wait until you have awarded the contract for your project. The contractor must submit the items listed below.
 - Completed and signed annual registration form (this form is valid for 12 months and must not expire before the completion date of your project)
<https://www.co.goodhue.mn.us/DocumentCenter/View/1055>
- Current certificate of insurance that meets County standards:
 - Naming the County as additional insured
 - General Liability of \$1,500,00 Per Occurrence
 - Personal & Advertising Injury of \$1,500,000
 - General Aggregate of \$3,000,000
 - Automotive Liability of \$2,000,000 Per Occurrence Combined Single Limit
 - Workers Compensation per Statute
 - May use an umbrella or excess liability insurance policy to supplement the Applicant's policy limits to meet the full policy limits
- \$30 registration fee and \$90 utility permit fee (cash or check)

Right-of-Way Permits on County Right-of-Way are Subject to County Ordinance and the following General Provisions

DEFINITIONS

Definitions are the same as those used in the County Ordinance.

GENERAL

I. Utility construction in the right-of-way under County jurisdiction is regulated by Goodhue County Ordinance for the management of utilities in the public right-of-way; state law; state rules; and federal regulations.

II. Burning or disking operations and/or the use of chemicals to control or kill trees, brush, and other vegetation is prohibited without prior approval from the County Highway Engineer.

III. All waterways and lines of drainage shall remain operative.

IV. Wherever topsoil and sod are disturbed they shall be replaced and maintained satisfactorily until the turf is established.

V. The utility facility and installation shall not interfere with any existing utility facilities on the county highway right of way.

VI. When necessary, barricades, warning devices and flagmen shall be provided by the Utility during all phases of their construction and maintenance operations on county highway right of way.

VII. At the time of construction of the utility and at the times of subsequent maintenance, prior approval shall be obtained from the County Highway Engineer for the cutting and trimming of trees within the county highway right of way. Wherever trees are cut the resulting stumps shall be removed unless otherwise provided in the Special Provisions of the Permit. Any holes caused by stump removal shall be backfilled, the area leveled and all materials associated therewith disposed of outside the county highway right of way. The Utility shall advise the County Highway Engineer at least 48 hours in advance of its intent to start clearing and grubbing operations so that proper supervision can be provided.

VIII. The Utility shall notify the County Highway Engineer of its intent to perform service and maintenance operations which will interfere with the flow of traffic on county highways, and shall obtain his approval prior to performing such operations. However, the Company may perform service and maintenance operations on county highways including opening and disturbing the surface of the right of way without prior approval in those instances where an emergency exists that is dangerous to the life or safety of the public and which required immediate repair. The Utility shall take all necessary and reasonable safety measures to protect the traveling public and shall notify the County Highway Engineer at the earliest possible moment.

IX. If at any time Goodhue County, acting through its Board of County Commissioners, shall deem it necessary to make any improvement or changes on all or any part of the right of way of the county highway which affect a utility located on county highway right of way, then and in such event, the owner of the utility shall, within **30** days after written notice from the Board of County Commissioners or its authorized agent, proceed to alter, change, vacate or remove said utility from the county highway right of way so as to conform to said county highway changes and as directed by the Board of County Commissioners. Such work shall be done without any cost whatsoever to Goodhue County and shall be completed within the date specified in said written notice. The Utility shall assume all liability and save Goodhue County harmless from any and all claims of damage of any nature whatsoever occasioned by reason of not having removed said utility within the time specified in said notice.

X. The Utility shall assume all liability for, and save the County, its agent and employees, harmless from, any and all claims for damages, actions or causes of action arising out of the work to be done herein and the continuing uses by the Utility, including but not limited to the placing, constructing, reconstructing, maintaining and using of said utility under the application and Permit.

XI. The Board of County Commissioners may require the Utility, or its contractor, to furnish a deposit in the form of a certified check, a surety bond or corporate undertaking, in favor of the Board of County Commissioners of Goodhue County, for any expense incurred by the County in the repairing of damage to any portion of the county highway right of way caused by work performed under a Permit, including any out of the ordinary engineering supervision and inspection expense provided by the county. In those instances wherein a deposit is required, the amount of the deposit shall be specified in the Special Provisions of the Permit. If a check is furnished, any monies remaining over and above such expense shall be returned to the applicant.

XII. The Permit as issued does not in any way imply an easement on private property.

XIII. The installations shall be made in conformity with all applicable laws, regulations, and codes covering said installations. All installations shall be made in conformity with regulations of governmental agencies for the protection of the public.

XIV. Upon completion of an installation, the Utility shall restore the county highway right of way to its original condition. The Utility shall then notify the office of the County Highway Engineer of the completion of the work so that inspection can be made to determine its acceptability.

AERIAL

I. There shall be only a single pole line on the county highway right of way on either side of the center line thereof.

II. Longitudinal installations on county highways shall normally be located in the outer five (5) feet of the right of way. At crossing of the county highway, poles shall be placed at a minimum of thirty (30) feet from the

shoulder lines of the through roadbeds unless right of way widths are prohibitive to such location.

III. The location of all brace poles, anchors and anchor poles within the limits of the county highway right of way shall be approved by the County Highway Engineer.

IV. In those instances in which a Utility is issued a Permit or Permits for construction on both sides of the county highway right of way in a given area, such Permit is conditioned upon the Utility subsequently providing joint use to other Utilities upon reasonable terms mutually agreeable to the Utilities.

UNDERGROUND

I. All crossings of the roadbeds of the county highways shall be made by boring inside a casing or carrier pipe, or by jacking, unless this procedure is modified in the Special Provisions of the Permit. The auger shall not lead the casing or carrier pipe by more than one inch. Open trenching shall be restricted to the area from five (5) feet beyond the shoulder to the right of

way line except as modified in the Special Provisions of the Permit.

II. When pipes with bells or flanges are installed, the crossings of the roadbeds of the county highway shall be made by boring inside a conduit as provided in paragraph I of this section or jacking a conduit of sufficient diameter to permit threading the carrier pipe through it.

III. All voids caused by jacking or boring shall be filled by pressure grouting. The grout material shall consist of a sand-cement slurry of at least two sacks of cement per cubic yard and a minimum of water to assure satisfactory placement.

IV. The underground utilities shall be so installed as virtually to preclude any necessity for disturbing the roadbeds to perform maintenance operations.

V. Underground installations shall be accomplished without damaging or destroying the principle root structure of specimen trees.

LOCATION SKETCH

Show location of proposed facility in relation to the centerline of the county highway and other pertinent features such as right of way line, shoulder line, curb line and edge of surfacing. The facility should also be referenced to adjacent landlines.

Utility Permit

Reference: Project _____
C.S.A.H./Co. Rd. _____

In accordance with the application herein, (excavation, obstruction) and subject to the extent the County has the right by law, rule, or regulation subject to the County's rights to said property and in accordance with the general conditions and "special provisions" of the application and the County Ordinance dated ___ to which the County and Applicant hereby agree a Utility Permit is hereby granted by GOODHUE COUNTY to obstruct, excavate and thereafter maintain a _____ on or across, under, or along the right-of-way of a road under County jurisdiction in the location shown on the sketch in the application, or in such location as may be specified by the Department of Public Works in the Special Provisions hereof.
